FOR IMMEDIATE RELEASE
August 28, 2018

Planned Power Outage at Clinton Public Hospital ***Outpatient Lab & X-ray Affected***

The Huron Perth Healthcare Alliance is advising the public that the Outpatient Lab and X-ray services at the Clinton Public Hospital will be unavailable to the public from 9:00 am to 1:00 pm on Thursday, August 30, 2018 due to a planned power outage.

This partial power outage will provide an upgrade to the hospital's electrical distribution system and only essential services will be available.

"As you may be aware we had an interruption in power at Clinton on August 23," says John Wilson, Manager Facilities Management. "This planned outage proactively replaces the faulty transformer involved in that interruption."

If a patient has a physician requisition for blood work that must be completed on August 30, 2018, they may visit the Seaforth Community Hospital Laboratory or visit another community laboratory test provider. If a patient has a physician requisition for an X-ray, they may come to the hospital from 8:00 am to 9:00 am, or after 1:00 pm, or visit the Seaforth Community Hospital or another X-ray service provider.

"We do apologize for any inconvenience this may cause," adds Wilson. "We thank you for your patience as we work to complete this necessary upgrade."
