CT SPINE APPROPRIATENESS CHECKLIST

Choosing Wisely Canada

This checklist is based on the **Choosing Wisely** *criteria and the* **CORE Back Tool**. *It is required for all adult (18+) outpatient CT spine referrals.* ***Please include with CT requisition. For most clinical concerns, CT should be ordered only if there is an MRI contraindication as MRI is superior to CT. Exceptions include suspected fracture, further characterization of known bone lesion, pre-surgical or post-surgical assessment.***
